

SHRINK WRAPPING MACHINE

 **SS Engineers
& Consultants**

FULLY AUTO COLLECTING ARRANGING & COUNTING PACKAGING

The shrinkable film Packing Machine is specially used for packing bottle water, juice, wine, beer, etc. It uses plastic film for packing bottle water. It includes automatic packing machine and pyro-condensation machine. Film Packing Machine is equipped with transducer, which can adjust various speeds for packing water bottles. Pyro-condensation machine has double-cycle system, which can save cost and assure the packing quality. The cutting system abides by international rules and with best sealing quality. The shrinkable film cheaper than carton box. There are no problems in applying bar cod on the film. Stable pack and good stacking qualities. The film can be printed for specific promotional advertising effect and inserted coupons for sales promotion. Encourages the sale of multipack instead of single products. Product are easily distinguished and managed. The PE film can be easily recycled. The machine is controlled by PLC program, so the action are smooth and simple. It's very easy to do arrangement on production line. Simple and clean appearance is the best equipment for good manufacturing process factory.

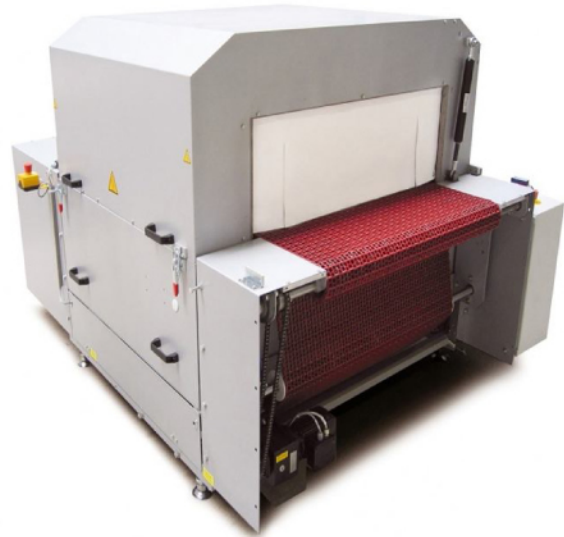

Technical Specifications:

Power Source	- 220V, 50Hz
Power	- 35 KW
Air pressure	- 4-6kg/cm2
Capacity	- 15 Packs per Minute
Max packing size	- 500mm x 400mm approx.
Dimension	- 1200x1100x1950mm approx.
Weight	- 1500 kg approx.

Features:

- Easy to adjust for different sizes packing, simple operation , automation control and it can be operated by un-experience worker to raise production efficiency.
- To pack collectively to save packing material and labor so as to lower cost
- Available to pack for square, flat or round commodities etc. With perfect and beautiful effects.
- Without paper box to cushion for the bottom of commodities which are being packed.
- Machine outward stranger with rustproof & backing treatment, thus it is beautiful & durable.
- To break through traditional operating procedures, it adopts of electrical system to increase output capacity. Can be used with computer operation or by PLC program controller connect with production line.
- Packing materials are available for PE, PVC & OPP.
- Usage for glass bottle, plastic bottle, aluminum can, iron can, paper box etc. including hard shells.

SHRINK TUNNEL

- To assure the quality without being damaged save electricity and to increase profits.
- Heat oven for contracting will send out even heat radiation. Delivery is done by roller with durability. And the speed is controlled and driven by DC motor.
- Special air flow direction construction for color/non-color film, can shrink products beautifully and smoothly.
- Variable speed tunnel conveyor, automatic thermostat controls, simple operation.
- Silicone rubber coated conveyor belt rods.
- Various pack formations can meet the trend of wholesale.
